To Our Many Friends and Patrons

The very first thing we want you to see when you open this catalogue is a word of appreciation.

You know how difficult it is to say even "Thank You" in a personal and sincere way when it is confined to writing. We want you to know how very much your patronage has meant to us, how greatly we appreciate it, and how sincere we are in our efforts to continue this pleasant relationship. We look back with gratitude upon the manner in which our services have been received in the past.

We thank you for your patronage and good will, extending as it has in many cases, over a great many years of business friendship, and we hope our relations will continue to be mutually pleasant.

It is not our ambition to do an immense wholesale business but rather to carry on a carefully conducted retail trade, making sure that every customer is well served and given full value for his money.

To fully satisfy each customer that his interest is carefully considered when he intrusts his orders here, is our earnest ambition.

McKAY NURSERY & ORCHARD COMPANY,
Lucedale, Miss.

MEMBER OF:

American Association of Nurserymen
Southern Nurserymen's Association
National Pecan Grower's Association

The Papershell Pecan

In the following pages we have endeavored to supply the grower with the information necessary to successful pecan culture, which we have obtained during the many years of experience we have had in orcharding as well as propagating, packing and shipping trees, and are glad to impart this knowledge to our customers.

The Pecan has become a very important nut in recent years, particularly so in the Southern States. It has been said that the pecan is the KING OF ALL NUT BEARING TREES, and properly so, as there is no other fruit or nut tree which fits so well into the general farming schedule of this region as the pecan. It may be grown in the region from Florida to Virginia and west through Oklahoma and Texas.

Pecan growing is now an established industry, and fear of overproduction should not be considered, as it will be many years before the pecan nut will get beyond the reach of the luxury class.

The enormous increase in importation of nuts, which has reached the sum of more than fifty million dollars in one year, is good evidence that we have a reliable home market to say nothing of the exporting we will be able to do with the pecan.

A few of our genuine papershell pecan trees in bearing will pay taxes and insurance on an ordinary home and supply delicious and wholesome food for the entire family, as well as make an inviting shade.

NURSERY STOCK FROM BEARING ORCHARDS

The grafts or scions from which we propagate our pecan nursery stock are carefully selected from heavy bearing trees; hence, every tree propagated in our nursery is strictly a bred-up early bearing tree, and the quality cannot be surpassed. Only recently have pecan nuts from our bred-up earl y bearing orchard trese won first prize at a number of fairs throughout Mississippi.

We have thousands of the finest bred-up papershell pecan trees that are staight, clean, and thrifty, and which have extra fine root systems. Quite a few of the trees begin bearing while in the nursery.

SELECTING LAND FOR PECANS

Pecan trees adapt themselves to a wide range of soils and will thrive on clay loams, rolling red lands, creek and river bottom lands; in fact, pecan trees do well on any land that will grow good cotton. The soil should not be low and wet but should be well drained, yet it should contain a goodly supply of moisture. Do not put pecan trees on seepy or crawfishy lands.

FERTILIZATION

Barnyard fertilizer or several pounds of high grade commercial fertilizer should be applied to each tree. Care should be taken, however, not to let fertilizers come in direct contact with roots of trees. The best way to apply fertilizer, after the trees have been planted, is to scatter it around the trees ,about one to two feet from the body, increasing the distance about one foot each year, and work in by hoeing or ploughing. Fertilizers should be applied in late winter or early

spring so that the trees will make a fine growth the following spring.

Planters should **NOT** put fertilizer into the hole at the time planting is done, as such practice is very dangerous and is likely to scald roots of trees, thereby causing them to die.

Some of Our Fine Pecan Stock

CULTIVATION

Pecans, as well as other fruit trees, should be cultivated at regular intervals by ploughing and hoeing. The land may be farmed almost as though the trees had not been planted, provided a strip of land several feet wide is left unplanted on each side of the tree rows, which strip should be cultivated regularly to conserve moisture and to keep the trees in good growing condition.

TREES PROPERLY PRUNED

We send out all trees properly pruned, **UNLESS OTHERWISE INSTRUCTED**, just as though we were going to plant them ourselves. There is an unavoidable loss of some roots when the trees are dug; therefore, the taller grades of trees should be top-trimmed, in order to balance the top against this loss. When our trees are properly pruned, handled, and planted, there is no reason at all why any of them should die. Therefore all trees are properly pruned by us before they are shipped, leaving nothing for the planter to do but set them out. The heights of our trees are calculated from the ground up before trees are dug; but after they have been properly pruned, the height is reduced somewhat; so if, when your order is received, the height of the pruned trees is less than listed in catalogue, this is the explanation.

It is quite natural for a customer to want his trees to be as large as possible, and it is almost impossible to get him to cut his trees back; however, trees that are properly pruned will not only LIVE BETTER, but they will make proper headed trees, and will, within a year or two, BE LARGER than trees that were not pruned.

PROPER TIME TO PLANT TREES

Fruit trees can be set any time after they have become dormant and the leaves have shed until the trees begin budding again, which in this section, is about November 15th to March 1st. Roots of trees begin growing as soon as trees are transplanted; so if planting is done in November or December, the roots of the trees will have a firm hold on the soil by the time spring opens up, and the growth, consequently, will be strong and vigorous.

Quite a bit of planting is successful however, as late as March 15th or April 1st; but if trees are planted late, extraordinary care should be given to see that the trees are watered frequently, are well mulched, and that the ground is cultiivated at regular intervals.

PLANTING INFORMATION

We like holes for pecan trees dug about 30 inches deep and 30 inches wide. This will permit planting with all the roots in their natural position and also make an allowance for pulverized dirt in which the new roots can push out easily. In digging, pile the top soil on one side of the hole and the bottom soil on the other. Loosen up the soil in the bottom of the hole thoroughly, then place trees same depth as they stood in nursery row, filling the top soil in first and working it around roots of the trees with the fingers, being sure that the soil is pulverized. When the roots are covered, pack the dirt firmly by tramping; then apply a bucket of water, if possible, allowing it to settle, throw in more dirt and tramp thoroughly until the hole is filled to a point just below the ground level, leaving a slight depression to catch and hold water.

BEST VARIETIES OF PECANS TO PLANT

After close study and observation, we find that the Stuart, Success, and Schley pecans are the best varieties. They have all been tested and proved to be the best suited to the different kinds of soil in the Southern States. We consider the Stuart and Success the VERY best; therefore, we plant our orchards to these two varieties.

VARIETIES OF PECANS DESCRIBED

Stuart: This is one of the very best papershell pecans and has been thoroughly tried out. Nuts are large to very large, oblong in shape shell of very good cracking quality, kernel full and plump. This is a heavy bearer, and is being planted extensively.

Success: The Success pecan has, no doubt, attracted more attention than any other variety in recent years and is continually gaining popularity. Size, large, oblong, tapering to the apex. Shell, thin; cracking qualities, good; partitions, thin; kernel, large, full and plump. The tree is a sturdy grower and heavy bearer.

Schley: This variety is probably the highest priced nut on the market, but it is not as heavy a bearer as the Stuart or Success. Size, medium to large, oblong, somewhat flattened; shell, very thin, separates easily from the kernel; kernel, full and plump; flavor, exceedingly rich; quality, the best.

Price on Papershell Pecan Trees

Size	Each	Ten	100	1000
2 to 3 ft.	$ .65	$ 6.00	$ 55.00	$500.00
3 to 4 ft.	.75	7.00	65.00	600.00
4 to 5 ft.	.85	8.00	75.00	700.00
5 to 6 ft.	1.00	9.00	85.00	800.00
6 to 7 ft.	1.25	11.00	95.00	900.00
7 to 8 ft.	1.50	13.50	120.00	1000.00
8 ft. to large	2.00	17.50	165.00	
Large	3.00	27.50	200.00	
Extra special	4.00	37.50		

50 trees take the 100 rate. 500 trees take the 1000 rate.

OUR TREES HAVE ABUNDANCE OF ROOTS

Unless trees have good root system they cannot grow and thrive. It is a well known fact that a tree with plenty of roots will grow off better than one with few roots. We have ideal soil and plenty of moisture for growing trees; hence, we do not believe trees with a better root system than ours can be produced.

In digging our trees, we use specially constructed digging shovels, which we find to be the very best tool with which to dig trees. Utmost care is exercised in digging so that trees will have an abundant supply of roots.

CUSTOMERS ARE SATISFIED

It is our aim to make a friend of every customer and we believe we have succeeded in doing this. We receive scores of orders from new customers each season, because old customers tell their friends of the excellent stock, the good service, and fair treatment they always receive from us.

Satsuma Oranges

We find that the Owari strain is the best variety and it is, therefore, the only kind propagated by us The fruit is large, flattened, depressed at both stem and blossom end, has thin smooth rind, and is nearly or quite seedless. Young trees of this strain are heavy bearers and, if properly cared for, will bring early returns on the investment. The Satsuma stands a much lower temperature than any other orange, and its eating quality is superior to any other.

Price on Satsuma Orange Trees

Size	Each	Ten	100
½ to ⅝ inch caliper	$ .40	$3.50	$30.00
⅝ to ¾ inch caliper	.50	4.50	40.00
¾ to 1 inch caliper	.60	5.50	50.00
1 to 1¼ inch caliper	.75	7.00	60.00
Extra Special	1.00	8.50	

Fifty trees take the hundred rate.

KUMQUATS

This is the smallest of the citrus fruits in general cultivation in this country; and in point of hardiness, it ranks with the Satsuma Orange. Very appetizing jelly

and marmalade may be made from the fruit and it can also be crystallized.

Neiwa: This is considered the best of all varieties of kumquats for eating. The fruit is round, plump, and sweet when fully ripe.

2 years, branched .....Each $1.00

Block of Our Pineapple Pear Stock
Note How Healthy They Are

PINEAPPLE PEAR

An introduction from the Orient and was first known as the Chinese Sand Pear, but more recently has been named Pineapple Pear and is now sold under that name. It is a good looking fruit of large size, and in quality it compares with the Kieffer. The flesh is somewhat coarse, crisp, and very juicy. For cooking or canning purposes or for any ordinary use, it is an excellent variety. This is, beyond question, the most valuable pear in the lower south.

It is a very vigorous grower and a prolific bearer and is the one pear that has proven free from blight. The Pineapple Pear is a long lived tree, and as a commercial proposition it has proven a success.

Price on Pineapple Pear Trees

Size	Each	Ten	100
3 to 4 ft.	$ .35	$3.00	$25.00
4 to 5 ft.	.40	3.50	30.00
5 to 6 ft.	.50	4.50	40.00
6 to 7 ft.	.60	5.50	50.00
2 years, well branched	.75	6.50	60.00
Extra Special	1.00	8.50	

Peaches

We list below the best varieties of peaches for the lower South.

VARIETIES OF PEACHES DESCRIBED

Early Rose: Medium size, deep red, good qaulity, one of the earliest, ripening middle of May.

Carmen: Large size, bright red cheek, delicious flavor, heavy bearer, freestone. Ripens June 10th to 20th.

Belle of Georgia: Large size, skin white with red cheek, flesh white, firm, excellent flavor, rapid grower, freestone. Ripens July 1st to 15th.

Elberta: Very large, yellow with red cheek, flesh juicy and highly flavored, freestone. Ripens July 15th to 25th.

Hiley: Very large with red cheek, flesh white, excellent flavor, very prolific. Ripens last of July.

J. H. Hale: Largest of all varieties. Color is deep yellow overspread with carmine; flesh firm, fine grained, and solid. The flavor is most delicious. Freestone. Ripens middle of July.

Price on Peach Trees

Size	Each	Ten	100
18 to 24 in. June Buds	$ .20	$1.75	$15.00
4 to 6 ft., two years	.50	4.00	35.00

Fifty trees take the hundred rate.

PLUMS

Red June: Size, medium to large; color, deep vermilion red; a vigorous grower. Ripens June 1st to 15th.

Abundance: Large size, round, slightly oblong, color yellow, good keeper, trees vigorous and productive. Ripens June 15th to July 10th.

Price on Plums

	Each	Ten
3 to 4 ft.	$ .50	$4.00

APPLES

Red June: Medium to large, oblong, conical, dark red, flesh tender with a mild sub-acid flavor; commencing to ripen early in June and continuing six weeks.

Delicious: Of good size, dark red, blending to a golden yellow at blossom end; oblong, tapering to calyx. Fine grained, juicy, slightly acid, melting. Among the best for the home orchard or market. Ripens in October.

Price on Apples

	Each	Ten	100
3 to 4 ft.	$ .35	$3.00	$25.00

JAPAN PERSIMMONS

Tane-Nashi: Large to very large, roundish, conical, pointed, very smooth; skin, light yellow changing to bright red; flesh, yellow, seedless; quality, very fine; vigorous, and prolific. Uniform size, quality and shape. We consider this the very best variety of Japan Persimmons grown.

3 to 4 feet	Each, $ .50
4 to 5 feet	Each, .60

FIGS

Celeste: Medium size, pear-shaped; color, purplish brown; very delicious and best for preserves and canning; will stand more freezing than other varieties.

Price on Figs

Size	Each	Ten
2 to 3 feet	$ .30	$2.50
3 to 4 feet	.40	3.50
4 to 5 feet	.50	4.50

MUSCADINE GRAPES DESCRIBED

Scuppernong: Muscadine type. Bunches composed of eight or ten very large berries, bronze colored when fully ripe; flesh pulpy sweet, quality excellent. One of the best variesties. Ripens August and September.

Price on Scuppernong Grapes

2 year No. 1 ..... Each $ .50

BUNCH GRAPES DESCRIBED

Concord: Bunches and berries very large, blue-back; flesh, sweet, pulpy; vine, vigorous. Heavy bearer.

Niagara: Berries very large, greenish yellow, flesh sweet and of good quality. Vine vigorous and prolific.

Price on Bunch Grapes

	Each	Ten	100
2 year No. 1	$ .25	$2.00	$15.00

EVERBEARING MULBERRIES

Hicks: One of the very best everbearing sorts. Wonderfully prolific; fruit, sweet; excellent for poultry and hogs. Fruit produced continually during a period of four months.

Price on Everbearing Mulberries

	Each	Ten	100
3 to 4 feet	$ .60	$5.00	$40.00
4 to 6 feet	.75	6.50	

CHERRIES

Early Richmond: Very prolific; medium sized; dark red, melting, juicy, acid, desirable for cooking; considered one of the very best varieties. Ripens in June.

Price on Cherries

	Each	Ten
3 to 4 feet	$ .60	$5.00

VISIT OUR NURSERIES

We are glad at all times to have prospective purchasers visit our nurseries. There are thousands and thousands of vigorous, thrifty, straight, smooth, and healthy trees in our nurseries, which, owing to our abundant rain fall, have the finest root system that can be found anywhere. Come and see for yourself what fine nursery stock we grow.

Ornamental Shrubs

PLANTING THE HOME GROUNDS

The object in planting the home grounds is to make a pleasing effect. Best results can be obtained from planting plans which should be made so as to show the placing of all plants. It should locate the house, garage, boundaries, walks and drives, as well as trees and shrubs already in place.

Shrubs should be used in masses around the foundation of the building, in the corners of the grounds, and along the boundary lines. Leave an open space of lawn. The taller specimens should be in the background using smaller growing plants of various heights to bring the border to the ground.

BALLED AND BURLAPPED EVERGREEN SHRUBS

This is the proper method of handling all evergreen shrubs. They are dug with their roots undisturbed and surrounded by the earth in which they grow. By this method your trees or shrubs are sure to live and the results are immediate.

Prices on evergreens are for trees and shrubs balled and burlapped.

BROAD LEAVED EVERGREENS

ABELIA GRANDIFLORA

Glossy dark green foliage and small white flowers, tinted with pink. Blooms from May until October.

18 inch plants	$ .75
24 inch plants	1.00
36 inch plants	1.50

PITTOSPORUM TOBIRA

Shiny green foliage clustered at end of twigs; small white flowers.

12 to 18 inch spread	$1.50
18 to 24 inch spread	2.00
2 to 3 feet spread	2.50
3 to 4 feet spread	3.00

PITTOSPORUM TOBIRA VARIEGATA

Same as above, except foliage is light green, variegated white

12 to 18 inche spread	$1.50

EUONYMUS JAPONICA

Dark green glossy foliage, ideal for group or foundation plantings

18 to 24 inches	$1.00
2 to 3 feet	1.50

BOXWOOD

Small dark glossy green leaves. Can be sheared any shape

18 to 24 inches	$1.00
2 to 3 feet	1.50

LIGUSTRUM LUCIDUM COMPACTUM

(Compact Wax Privet)

Dark green glossy foliage with white flowers. Clusters of purple berries in autumn

12 to 18 inches	$1.00
18 to 24 inches	1.50
2 to 3 feet	2.00
3 to 4 feet	2.50

LIGUSTRUM LUCIDUM PYRAMIDALIS

(Upright Wax Privet)

Upright growth, dark green glossy foliage

18 to 24 inches	$1.50
2 to 3 feet	2.00
3 to 4 feet	2.50

LIGUSTRUM JAPONICUM (Japan Privet)

Bushy shrub with large leaves. Desirable for screens and tall hedges

2 to 3 feet	$1.00
3 to 4 feet	1.50
4 to 5 feet	2.00
5 to 7 feet	3.00

CAMELLIA JAPONICA

Colors: Pink, red and variegated

12 to 15 inches	$1.50
15 to 18 inches	2.00
18 to 24 inches	3.00
24 to 30 inches—(Red only)	4.00
30 to 36 inches—(Red only)	5.00
3 to 4 feet—(Red only)	6.00

JAPANESE TEA PLANT (Camellia Thea)

Upright growth, dark green foliage, small white flowers in autumn

18 to 24 inches	$1.50
2 to 3 feet	2.50

NANDINA DOMESTICA

Green in summer with beautiful red leaves and clusters of scarlet berries in winter

12 to 18 inches	$1.00
18 to 24 inches	1.50
24 to 30 inches	2.50

LOQUOT (Japan Plum)

Large handsome leaves, white blossoms borne in spikes appearing during winter months

18 to 24 inches	$1.50
2 to 3 feet	2.00
3 to 4 feet	2.50

AZALEAS

Colors: Watermelon Pink, salmon pink and brick dust

12 to 18 inch plants	$1.50
18 to 24 inch plants	2.50

CHERRY LAUREL

Rapid grower, can be pruned any shape desired

2 to 3 feet	$1.00
3 to 4 feet	1.50
4 to 6 feet	2.50
6 to 8 feet	3.50

MAGNOLIA FUSCATA (Banana Shrub)

Compact, bushy with glossy leaves and cream colored flowers

12 to 18 inches	$1.50

JAPANESE YEW

Upright growth, with dark green foliage, will thrive in shade

18 to 24 inches	$2.00
2 to 3 feet	3.00

DWARF CAPE JASMINE (Gardenia Radicance)

Dwarf spreading plant with small dark green leaves, and medium size fragrant white flowers. Suitable for borders and pot plants

18 to 24 inch spread $1.50

PHOTINIA GLABRA

Upright growth, foliage bright red in early spring and again in autumn

2 to 3 feet $2 00
3 to 4 feet 3.00

ARBORVITAES AND OTHER CONIFEROUS EVERGREENS

BERCKMAN'S GOLDEN ARBORVITAE

(Aurea Nana)—Golden Color

12 to 15 inches $1.00
15 to 18 inches 1.50
18 to 24 inches 2.00
24 to 30 inches 2.50
30 to 36 inches 3.50
3 to 4 feet 5.00

ROSEDALE ARBORVITAE

Blueish green feathery-like foliage

12 to 15 inches $1.00
15 to 18 inches 1.50
18 to 24 inches 2.00
2 to 3 feet 3.00

BAKER'S ARBORVITAE

18 to 24 inches $1.50
2 to 3 feet 2.50
3 to 4 feet 3.50

BIOTA COMPACTA ARBORVITAE

Dwarf compact growth. Can supply in both green and golden colors

15 to 18 inches $1.00
18 to 24 inches 1.50
2 to 3 feet 2.50
3 to 4 feet 3.50

BIOTA ORIENTALIS (CHINESE) ARBORVITAE

Tall, fast growing

2 to 3 feet $1.00
3 to 4 feet 1.50
4 to 6 feet 2.00
6 to 7 feet 2.50

AMERICAN ARBORVITAE

Compact, deep green color

12 to 15 inches $1.00
18 to 24 inches 1.50

CEDRUS DEODARA (HYMALAYAN CEDAR)

A broad growing pyramidal tree, drooping branches, blueish green foliage. Desirable as lawn specimen

18 to 24 inches $2.00
2 to 3 feet 3.00
3 to 4 feet 4.00
4 to 5 feet 5.00

ENGLISH JUNIPER

Upright in form, narrow pyramidal and graceful; bright green foliage

12 to 18 inches	$1.00
18 to 24 inches	1.50
2 to 3 feet	2.50
3 to 4 feet	3.50

CHINESE JUNIPER

Slender with spreading branches

2 to 3 feet	$2.50
3 to 4 feet	3.50

PFITZER JUNIPER

Low growing, broad bushy habit, blue-green foliage
Extremely hardy

12 to 15 inches	$2.00
15 to 18 inches	2.50
18 to 24 inches	3.50

ITALIAN CYPRESS

18 to 24 inches	$1.50
2 to 3 feet	2.50
3 to 4 feet	3.50
4 to 5 feet	5.00

CUNNINGHAMIA (CHINESE FIR)

Bright green foliage. Naturally grows large and bushy but if pruned, grows tall and graceful. Desirable as lawn specimen. Only fir that thrives well in the South.

2 to 3 feet	$3.00
3 to 4 feet	4.00
4 to 6 feet	5.00

DECIDUOUS SHRUBS

CRAPE MYRTLE

Colors: Pink, white, purple and red

2 to 3 feet	$ .50
3 to 4 feet	.65
4 to 5 feet	.75

SPIREA

Anthony Waterer: Dwarf compact bunchy growth, crimson blooms

Thumbergi: A dense small shrub, foliage bright green; white blooms

Stocky two year plants	Each, $ .50
Extra special plants	Each, .75

Van Houtte: Upright growth, bright green foliage with white flowers

18 to 24 inches	$ .35
2 to 3 feet	.50

HEDGE PLANTS

Amoor River Privet

2 to 3 feet plants, per 100	$10.00

SHADE TREES

Magnolia Grandiflora (Southern Magnolia)

2 to 3 feet	$ .75
3 to 4 feet	1.00
4 to 5 feet	1.50

CAMPHOR TREE

2 to 3 feet	$ .50

AMERICAN HOLLY

2 to 3 feet	$ .75
3 to 4 feet	1.00

CHINESE ELM (ULMUS PUMILA)

The fastest growing and the most graceful Elm

4 to 5 feet	$ .85

LOMBARDY POPLAR

4 to 6 feet ..... $ .75

PALMS

Phoenix Canariensis

2 year plants $1.50

CONDITIONS OF SALE

TERMS:—Cash should accompany orders. On orders booked in advance of shipment, a deposit of 10 per cent should be made, balance to be paid at time of shipment.

HOW TO SEND MONEY

Send money any way that is most convenient to you.

ACKNOWLEDGMENT OF ORDER

We acknowledge receipt of your order promptly.

NOTICE OF SHIPMENT

The day your order is shipped we notify you.

SHIPMENTS BY MAIL

We cannot ship trees by mail—except smallest fruits.

TIME OF SHIPMENT

Orders received during shipping season will be forwarded as soon after their receipt as possible, unless we are otherwise instructed.

SUBSTITUTION

In case we are out of size ordered, we will, if not otherwise instructed, ship the nearest size we have.

GUARANTEE

Our stock is guaranteed to be well rooted, thrifty, vigorous, true to name and shipped according to instructions. We further guarantee upon satisfactory proof that any bred-up papershell pecan tree we sell you does not prove true to variety, to refund promptly in cash FIVE TIMES the amount you pay for it.

Should any of our pecan trees die within one year—if properly planted and cared for—we will share the loss with you equally and replace trees at one-half the regular price.

DIGGING AND PACKING

Our trees are freshly dug and roots kept damp at all times. The roots of all trees are carefully and scientifically packed in damp moss and the bundle of trees, roots and bodies are covered with suitable packing material, and then burlapped. Prices are for trees properly packed, tagged and delivered at express, or freight office Lucedale, Mississippi.

CLAIMS

If by chance any errors should occur, they will be gladly corrected, provided claim is made promptly after receipt of trees.

TREES INSPECTED

All our shipments of nursery stock bear copy of certificate of inspection issued by the Mississippi State Entomologist, showing that our nursery stock has been properly inspected. All inspection laws of other states are complied with.
